Professional Summary

Highly motivated B.Tech AI & Data Science student with strong foundations in Java, Python, SQL, and Data Analytics. Hands-on experience in AI-based projects, database management systems, and IoT solutions. Passionate about applying data-driven approaches and intelligent systems to solve real-world problems. Proven leader as Student Coordinator for the AI & DS Department, with a proactive, self-learning mindset.

Education

B.Tech - Artificial Intelligence & Data Science

2023 – 2027

V.S.B Engineering College, Karur · Currently 4th Year

CGPA: 8.64 / 10

Class XII - Higher Secondary

March 2023

Sankar Ponnar Higher Secondary School, Palani

Score: 86.5%

Class X - Secondary School

March 2021

Devi Matriculation Higher Secondary School, Palani

Result: All Pass

Project Experience

AI Integrated Hospital Management System

Designed a system to manage hospital operations using AI-driven data handling and intelligent automation techniques for efficient patient and resource management.

COREBINDERZ - Startup Database Management

Developed a database-centric solution using MySQL to efficiently organize, query, and manage startup-related data for improved decision-making.

Smart Helmet Project (IoT)

Implemented a safety-focused IoT-based solution to enhance rider protection, integrating sensors with real-time alert mechanisms.

Speed Detection & Traffic Monitoring System

Proposed a system to detect over-speeding vehicles using sensors and cameras, integrated with a Python-based monitoring system for automated traffic enforcement.

I hereby declare that a information provided is true and correct to the best of my knowledge.
