

Test Case Document

Identity Portal — Password Reset Bot

Project	Identity Portal – Password Reset Bot
Module	Password Reset Workflow
Prepared By	QA / Developer
Test Type	Functional, Negative, Edge Case, Security
Total Test Cases	25
Status	All Scenarios Verified

01 Email Validation

Verify user lookup in SQLite DB

TC01	Valid registered email	user@example.com	Proceed to OTP generation	PASS
TC02	Unregistered email	unknown@test.com	Return USER_NOT_FOUND, log event	PASS
TC03	Empty email field	(blank)	Validation error: field required	PASS
TC04	Invalid email format	notanemail	Validation error: invalid format	PASS
TC05	Email with uppercase letters	USER@EXAMPLE.COM	Case-insensitive match, OTP sent	PASS
TC06	Email with leading/trailing spaces	user@example.com	Trimmed and matched successfully	PASS

02 OTP Generation & Delivery

OTP creation, storage and email dispatch

TC07	OTP generated for valid email	Valid email submitted	6-digit OTP created and saved in DB	PASS
TC08	OTP email dispatched via SMTP	OTP generation triggered	Email appears in MailHog sink	PASS
TC09	OTP is unique per request	Two reset requests	Two different OTPs generated	PASS
TC10	OTP expires after 10 minutes	Submit OTP after 10 min	OTP_EXPIRED error returned	PASS
TC11	Old OTP invalid after new request	Request OTP twice	First OTP rejected, second accepted	PASS

03 OTP Verification

Correct, incorrect and expired OTP scenarios

TC12	Correct OTP entered	705313 (valid token)	OTP_VERIFIED, proceed to password input	PASS
TC13	Incorrect OTP entered	000000 (wrong token)	Verification failed, retry prompted	PASS
TC14	OTP with extra spaces	7 0 5 3 1 3	Trimmed and validated correctly	PASS
TC15	Empty OTP field submitted	(blank)	Validation error: OTP required	PASS
TC16	OTP reused after successful reset	705313 (already used)	Rejected: OTP already consumed	PASS

04 Password Reset & Hashing

New password acceptance and SHA-256 storage

TC17	Strong password accepted	Makeit123@	Password hashed and stored in DB	PASS
TC18	Weak password rejected	1234	Strength check fails, re-prompt shown	PASS
TC19	Password stored as SHA-256 hash	Makeit123@	DB shows hash, not plaintext	PASS
TC20	Same password as current	OldPassword1@	Rejected: cannot reuse last password	PASS
TC21	Password with special characters	P@\$w0rd!#	Accepted and hashed correctly	PASS

05 Security & Audit Tests

Anti-enumeration, logging, and session safety

TC22	USER_NOT_FOUND does not reveal email existence	unknown@attacker.com	Generic response, no enumeration leak	PASS
TC23	Audit log created on success	Complete reset flow	PASSWORD_RESET event in audit log	PASS
TC24	Audit log created on failure	Wrong OTP submitted	FAILED_OTP_ATTEMPT event logged	PASS
TC25	Reset flow state resets on new session	Click Reset Flow button	All state cleared, fresh session starts	PASS

Test Summary

Category	Total	Pass	Fail	Pass Rate
Email Validation	6	6	0	100%
OTP Generation	5	5	0	100%
OTP Verification	5	5	0	100%
Password Reset	5	5	0	100%
Security & Audit	4	4	0	100%
TOTAL	25	25	0	100%
