CAREER OBJECTIVE

Motivated and detail-oriented Computer Science / AI student with a CGPA of 8.8, seeking an entry-level role in Software Development or Cloud Computing. Equipped with hands-on internship experience in PCB defect detection using AI/ML (Infosys) and cloud computing (Let's Game Tech). Eager to apply strong programming fundamentals and project experience to deliver impactful, real-world solutions.

EDUCATION

10th - All Pass

12th – 85.8%

B.Tech – [Artificial intelligence and data science]
VSB Engineering College, Karur | **CGPA: 8.8 / 10.0**

2023– 2027

TECHNICAL SKILLS

Languages: Python, Java, C, SQL, HTML

Frameworks & Tools: TensorFlow, Scikit-learn, OpenCV, Flask, Docker, Git, Postman

Databases: MySQL.

Concepts: Machine Learning, Deep Learning, Computer Vision, Cloud Computing.

Soft Skills: Team Collaboration, Problem Solving, Communication, Time Management

INTERNSHIP EXPERIENCE

Infosys Springboard – AI Intern

Project: Development of an Application to Detect PCB Defect and Classification

Tech Stack: Python, TensorFlow, OpenCV, Deep Learning, CNN, Image Processing

- Built an AI-powered application to automatically detect and classify defects on Printed Circuit Boards (PCBs) using Convolutional Neural Networks (CNN).
- Implemented image preprocessing and augmentation pipelines using OpenCV to improve model accuracy on real-world PCB datasets.
- Achieved high classification accuracy across multiple defect categories including shorts, open circuits, and missing components.
- Designed and integrated a user-friendly interface for real-time defect detection and reporting.

Let's Game Tech – Cloud Computing Intern

Tech Stack: AWS / GCP / Azure, Docker, CI/CD, Linux, Networking

- Assisted in deploying and managing cloud infrastructure on AWS/GCP, ensuring high availability and scalability of services.
- Worked with containerization tools (Docker) and contributed to CI/CD pipeline configuration for automated deployments.
- Monitored cloud resources and optimized configurations to reduce operational costs and improve performance.
- Collaborated with the development team to migrate on-premise workloads to cloud environments.

PROJECTS

PCB Defect Detection & Classification System

Tech Stack: Python, TensorFlow, OpenCV, CNN, Flask

- Developed a deep learning model to detect and classify manufacturing defects in PCBs with high precision.
- Deployed the model as a web application using Flask for real-time visual inspection.

AI FOR INTELLIGENCE SALES AND REVENUE OPERATIONS

Tech Stack: Python, Machine Learning, Pandas, Scikit-learn, Flask

- Developed an AI-driven system to analyze sales data, forecast revenue trends, and identify high-value opportunities.
- Implemented predictive models to improve decision-making and optimize sales strategies.
- Deployed the solution as a web application for real-time insights and performance tracking

CERTIFICATIONS

- Salesforce Becoming an Agentforce Champion – Futureskills Prime
- Salesforce Administrator Explorer – Futureskills Prime
- Introduction to IoT and Digital Transformation – Cisco
- Programming in Java – NPTEL
- Distributed system and cloud computing - NPTEL
- Principles of Generative AI – Infosys Springboard
- Cybersecurity Essentials – Cisco
- Data science for beginners – Board infinity

ACHIEVEMENTS

- TCS iON Career Edge – Young Professional (TCS iON Platform)
- CGPA of 8.8 – Consistently ranked among top performers in the department.
- Successfully completed AI/ML internship at Infosys Springboard with a project in industrial defect detection.
